

Label Design, Barcode & Print Management Software

PRISYM DESIGN

PRISYM Design labeling software is a fully featured, easy-to-use package for designing label templates, creating barcodes and printing your labels in-house. It allows the inclusion of variable data such as product codes and descriptions, barcodes, logos, pricing, languages, symbols and images in your labels.

Label design made easy

- Design professional labels with simple templates and formatting options
- Import images and icons into your labels from an integrated picture library which can be supplemented with your own logos and visuals
- Effectively use variable data such as product codes, pricing, additional languages etc. into one template to reduce creating multiple label designs for similar products
- Create and verify commonly used barcode types
- Group labels into production batches to send to one or more printers to reduce time taken to print
- Produce supporting single page documents to include when dispatching your products

Creating and printing labels is made easy with a new Graphical User Interface (GUI)

Editions to suit your needs

PRISYM Design is available as either a stand-alone or networked solution. Created with the familiar Microsoft look and feel, it comes in three entry levels offering flexible label and barcode software, at an edition to suit your business needs, users and budget.

PRISYM Design is highly configurable, runs on Microsoft platforms and has over 500 dedicated printer drivers within the software to ensure high speed data transfer to a wide range of devices including thermal transfer printers, inkjet coders and RFID coders.

PRISYM Design Professional Edition

- Ideal for enterprise and multi-user environments, the professional edition provides the security, connectivity and reporting that larger organizations need. It allows multiple users to design, edit and print labels using variable data and can drive up to 10 printers concurrently (unlimited upgrade possible).

PRISYM Design Standard Edition

- Suitable for single users to design labels using basic variable data sets, the standard edition makes it a straight forward package for small organizations. A single workstation can drive up to 5 printers.

PRISYM Design Print Only Edition

- Appropriate for print operators, the print only edition has limited design features to achieve maximum performance when printing labels.

DATASHEET

PRISYM Design Software is compatible with over 500 printer families

Integration and connectivity

Print Production

Our software support over 500 printer families including thermal transfer, inkjet and industrial laser printers. PRISYM Design software provides easy connectivity with ERP or MRP systems to help integrate the labeling function with the rest of the business process.

Unrivalled Support

Prisym Solutions support team has specialist knowledge to make sure you know the “do’s and don’ts” of labeling. PRISYM Design can be purchased with software maintenance as part of the solution to make sure you have full peace of mind for your label production. We offer software support services that will seamlessly manage your company’s needs from troubleshooting to upgrades, re-installation, and configurations. The services include:

- Support hotline
- Onsite software support
- SLA levels to suit your requirements
- 24/7 support options
- Onsite customer training

Coding Technologies

PRISYM Design includes our best-of-breed barcode creation software module. It enables you to produce and verify commonly used barcode types including GS1, QR and Datamatrix. For the full range please contact the team.

Linear Barcode, DataMatrix and QR Code

What’s new in PRISYM Design?

User Experience:

- **New Graphical User Interface (GUI)** – to enhance user experience and simplify the label production process

Formatting:

- **Linked Blocks** – to control formatting and overflow of text within a label
- **Non Breaking Space** – to keep selected text grouped together
- **Variable Data Handling** – to improve the design and formatting of your labels when using variable data within labels and supporting documents
- **Dependent Variables** – to make only populated variable fields appear

Additionally:

- **Simplified Licensing Tool** – for easy transferring of licenses to other workstations
- **Improved Compatibility** – Microsoft Windows 7

Über Label ID Solutions

Our competence is the development and supply of high performance labeling solutions from design of layouts to integration in production lines. With over 20 years of experience in this field, we have developed a comprehensive range of software products with the necessary printing systems and consumables.

What edition do I need?

The chart below outlines and compares the features of each PRISYM Design edition. We recommend you speak to a member of our expert team who will be able to discuss your individual requirements and assist you in selecting the most suitable edition: +49 (0)5751 8911724 oder info@labelidsolutions.de
